

# Contract Management

In this time of uncertainty, understanding exactly what's in your contracts is more important than ever.

## Digitize

Upload, digitize, and centralize your contracts quickly. Our team will show you how.

## Identify

Search across and within contracts. Extract the terms and provisions that provide situational clarity

## Insight

Obtain an organized view by understanding exactly what is in your contracts.

---

## See Clearly and Act

Without a Contract Lifecycle Management (CLM) system, you are essentially flying blind. Your obligations and exposures are buried somewhere in a filing cabinet or someone else's email. With CLM, all that dead data comes into view. It becomes a live business asset – actionable intelligence extracted from your contracts portfolio.

## Automate the Chore

It is no secret that managing contracts is a burden for most businesses. As a task it too often falls on legal departments that are already stretched thin. By implementing a modern CLM system, you can automate that burden and free your legal team to focus on other, higher value projects.

## Solution Centric, Software Agnostic

Because Trustpoint.One is software agnostic, we are able to provide you a perfect match. We work with all the leading CLM platforms on the market, which each have their strengths. Our contracts team will choose the best platform for your specific needs.

### Organize

No more missed deadlines, automatic renewals or lost amendments

### Standardize

Improve consistency and risk profile across portfolios

### Control Cost

Standardization, automation and a dedicated team lowers per unit cost

### Reports

Run and export reports based on a custom set of metrics and terms

### Scalable

Improved awareness of entire lifecycle, no matter the volume of contracts

### Compliance

Create an audit trail and tracking of contractual obligations

## Customized, As Always

We'll assess your current contract management situation and assemble an implementation plan tailored to your needs. Whether you need consulting, platform selection, or a full team, we have you covered. Our solutions range from turnkey to the modification of an existing internal process.

## How to Get Started

The first step is review. Our contracts team will perform an audit and identify your needs before suggesting next steps.
