

# When Security is Essential

Remote depositions featuring  
government-certified security levels

## We Hear You

Many firms have been unable to utilize popular online meeting platforms due to security concerns.

Trustpoint has a solution. We offer a FedRamp encrypted, US based, US stored technology for your sensitive work product and deposition needs. When security is essential, use the same level of certified technology that the government does.

### Government Approved SaaS

Has reciprocity to DoD Impact Level 2

### U.S Only

Operated and controlled by only US Persons

### Independent Development

Independent software development LifeCycle that is implemented and controlled by US Persons only

**FedRAMP**
