Virtual Review Solutions

Trust.Review™ – The proven Trustpoint review solution, applied virtually. Our secure, virtual review solution builds upon proven talent and processes to establish geographically independent review teams.

We know that the need to work remotely will become increasingly necessary. We are committed to working with you and to continuing business uninterrupted. Our technology and IT systems allow us to work remotely on a fully efficient basis to provide you with the same level of service you expect from us.

Through Trust.Review, we can geographically expand our talent and extend a secure work environment to better balance the client's need for security with the time sensitivity of review engagements.

Proven Process, Applied Virtually
We use the same proven, process-driven approach whether the review is virtual or centralized. We start by selecting talent with a proven track record of review success. We add multiple layers of quality control and reporting to ensure the most efficient and accurate review.

Data Security
Data security always comes first. All our data centers are ISO & SOC certified. We provide a comprehensive set of secure virtual desktop solutions, which all leverage best in class AES- 256 encryption complimented with multi-factor authentication.

Defensible & Audit Ready
All virtual review activity is logged and centrally stored on our secure data servers, ensuring every action is verifiable, audit-ready, and defensible.

Secure ID Verification
Using secure multi-factor authentication, all team members are required to regularly verify their ID.

Quality Control
Our quality control measures ensure redundant checks at each stage of the review. No decision is left unverified.

Proven Talent
By choosing our reviewers based on their past history of review success, we deploy proven, vetted attorneys on every review project.

Clean Data
Just like in traditional review, each session is logged and recorded independently. There is no data-overlap among team members.

Additional Benefits of Virtual Review

Fast Ramp Times

By removing geographic constraints, you can assemble the best possible team in less time. Get your project up and running quickly.

Expert Talent

Your access to highly specialized talent increases by using a virtual approach. Obtain & retain the expertise you need no matter where they are in the world.

Cost Savings

Savings vs traditional review can be significant. There are no physical location costs associated with virtually assembled review teams.

The Virtual Review Process

Project Manager Assigned
Our virtual platform uses the same project managers as our traditional reviews, thus ensuring quality.

Team Assembled & Trained
Trustpoint pulls from our deep pool of proven talent. Training in remote review provided where necessary.

Virtual Environment Established
Remote login credentials, workstations, and centralized database created.

Workflows Applied
By relying on our existing process and workflows, we ensure an efficient, accurate review.

Daily Status Reports
Trustpoint provides daily reports listing project status, progress percentage, and results.

Migrating an Existing Review to the Virtual Platform

For all current or scheduled Trustpoint review projects, the transition to the virtual platform is essentially seamless. In most cases, we can retain the same project management and review team that is already in place, thus ensuring a minimal interruption to the process.

If you have a review in place that Trustpoint is not currently managing, speak with a member of our sales team today. We can quickly put in place a transition plan. With the faster ramp times of virtual review, you can be up and running quickly.

We are committed to supporting reviewers working remotely to enable seamless service to our clients, with the necessary technological and operational infrastructure already in place. Our commitment to providing you with the highest level of client service is unwavering and we are dedicated to ensuring there will be no disruption of our service to you.
