# Welcome to the Trustpoint Cloud

Simple, scalable, and secure workstations. It's time to say goodbye to the headaches of managing IT.

## Any place, any time, any device

We can install our cloud workspace on any internet connected device. Your team can work where you want, when you want, on what you want.

## The software you need

Besides standard business software like Microsoft Office, we can also install the specialized software required to run your firm. If it's not listed, don't worry, if the software can run on a server, we can put in on your cloud workstations.

## Cost visibility – welcome to IT with no surprises

For small to mid-size firms, the cloud is simply more economical, more reliable, and less stressful.

Trustpoint Cloud can manage your entire IT infrastructure for a single monthly subscription. There are no hardware failures or system upgrade costs lurking beneath the surface. You only pay for the users and software that you use every day.
